

Septentrio is a leading supplier of highly accurate GPS/GNSS receivers for demanding applications, requiring accuracies in the decimeter or centimeter range, even under difficult conditions. We provide board level OEM modules as well as system level GPS/GNSS receivers to our customers in machine control and construction, land and marine survey, mobile mapping, UAV's, GIS and more.

Septentrio is headquartered in Leuven, Belgium and has offices in Torrance, CA and Hong Kong, and partners throughout the world. For our offices in Leuven, Septentrio is seeking to hire a highly motivated professional for the following function:

Test Engineer – OEM GNSS Receivers

JOB DESCRIPTION

Starting from a set of product requirements, you shall be defining, executing and documenting tests on latest models of high-end GPS/GNSS receivers. You will approach the product from the user point of view and will work in close contact with the developers.

As **Test Engineer – OEM GNSS Receivers** you:

- Design & execute test procedures on new models of GPS/GNSS receivers
- Analyze GNSS data to detect anomalies in the receiver operation
- Characterize and Report on GNSS receiver performance
- Write scripts and programs to automate the execution of tests and data analysis
- Report the defects and follow-up firmware adaptations
- Work in close co-operation with SW developers and other test engineers

YOU

- MSc/BSc in Computer/Electrical/Industrial/Geomatics Engineering, Physics, or equivalent
- Experience with programming languages like Matlab, Python, C
- You have a critical and assertive attitude
- You are ready to organize and perform field test campaigns
- You have a hands-on mentality
- Team player, showing initiative, flexibility and sense for communication
- Knowledge of English is a must

We consider it an extra asset if you would already have knowledge of GNSS or experience in data analysis and data visualization. Experience with signal generators/scopes and RF lab equipment is also a plus!

JOIN US

In exchange for your talent, we have put together an interesting blend with opportunities for development, room for innovative ideas and offer a pleasant professional working environment with colleagues from all over the world, next to a competitive salary, fringe benefits and a good work-life balance.
